Cement | Modern Building Materials | Ready Mix Concrete

CONCREFO

DURAGUARD

ZERO M

Artiste

InstaMix

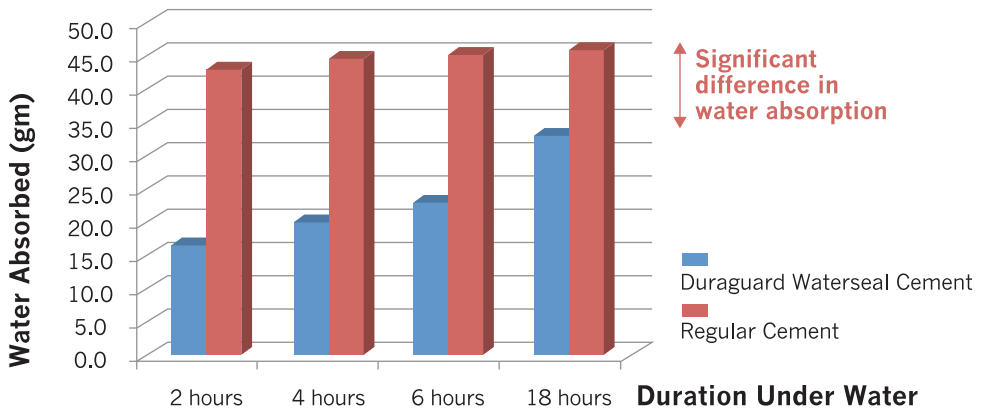

Features and Benefits:

- Repels water and help prevent water penetration into any surface constructed with Duraguard Waterseal
- Ability to absorb 55-60% less water when continuously exposed to it for hours
- Its unique damp lock feature blocks the micro pores in standard brick and mortar walls
- Prevents interior walls from sogginess and dampness
- Helps maintain the hygiene and aesthetic value
- Recommended for moisture laden underground structures
- Equipped with a corrosion inhibition property by forming hydrophobic compounds on steel surfaces
- Freshness of material contained for longer duration
- Reduces primer paint consumption by 15-25%, when applied directly

Comparison with a Regular Cement:

28-30% less absorption when exposed to water for 18 hours

WATER ABSORPTION ANALYSIS REPORT

DESCRIPTION	DURAGUARD WATERSEAL CEMENT			REGULAR CEMENT		
	Dry Cube Weight (gm)	Water Absorbed (gm)	%	Dry Cube Weight (gm)	Water Absorbed (gm)	%
After 2 hours under water	733.0	16.5	2.2	742.2	43.2	5.5
After 4 hours under water	733.0	20.2	2.7	742.2	44.8	5.7
After 6 hours under water	733.0	23.2	3.1	742.2	45.5	5.8
After 18 hours under water	733.0	33.1	4.3	742.2	46.1	5.8

Water absorption is almost half than that of regular Duraguard cement for up to 6 hours.

*According to internal laboratory tests. Results may differ based on the application mix and workmanship.
